## Alzheimer's & Dementia: The Journal of the Alzheimer's Association

Vol. 7 no 2. March 2011

Abstracts available online at [http://www.alzheimersanddementia.org/issues/contents?issue\\_key=S1552-5260\(11\)X0002-X](http://www.alzheimersanddementia.org/issues/contents?issue_key=S1552-5260(11)X0002-X)

|         |                                                                                                                                                             |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 127-32  | Developing a global strategy to prevent Alzheimer's disease: Leon Thal Symposium 2010                                                                       |
| 133-41  | Transforming cerebrospinal fluid A $\beta$ 42 measures into calculated Pittsburgh compound B units of brain A $\beta$ amyloid                               |
| 142-50  | An analysis of global research funding for the frontotemporal dementias: 1998–2008,                                                                         |
| 151-60  | Disease progression model for cognitive deterioration from Alzheimer's Disease Neuroimaging Initiative database,                                            |
| 161-70  | What Latino Puerto Ricans and non-Latinos say when they talk about Alzheimer's disease,                                                                     |
| 171-74  | Harmonization of magnetic resonance-based manual hippocampal segmentation: A mandatory step for wide clinical use                                           |
| 175-76  | Stopping a thief and killer: Alzheimer's disease crisis demands greater commitment to research. - <i>FREE Full text available online</i>                    |
| 177-84  | Defining optimal treatment with cholinesterase inhibitors in Alzheimer's disease,                                                                           |
| 185-96  | Advances in perfusion magnetic resonance imaging in Alzheimer's disease,                                                                                    |
| 197-207 | Global issues in drug development for Alzheimer's disease                                                                                                   |
| 208-44  | 2011 Alzheimer's disease facts and figures - <i>FREE Full text available online</i>                                                                         |
| 245-46  | Requiring an amyloid- $\beta$ 1–42 biomarker for prodromal Alzheimer's disease or mild cognitive impairment does not lead to more efficient clinical trials |
| 247-49  | Estimating power with effect size versus slope differences: Both means and variance matter                                                                  |
