

New Journals from the Resource Centre for August 2011

The Resource Centre is open to the public Monday to Friday 9 am to 5 pm.

Books, videos and DVDs are available for loan.

Reference materials and journals are not available for loan, but can be photocopied free of charge.

For a complete listing of items in our collection, as well as an extensive list of online materials in over 65 languages, please consult our online Resource Centre Catalogue at http://www.alzheimertoronto.org/lib_onlineCatalogue.htm.

NEW JOURNAL ISSUES AVAILABLE

The following journal issues have been published.

Please indicate which articles you would like to view and I will email/fax them to you as appropriate.

Please provide Journal title, issue number, pages & title for each article required.

# Alzheimer's & Dementia: The Journal of the Alzheimer's Association

Vol. 7 no 4. July 2011

Abstracts available online at <http://www.alzheimersanddementia.org/current>

|           |                                                                                                                                                               |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 365-366   | Output of the working group on magnetic resonance imaging abnormalities and treatment with amyloid-modifying agents                                           |
| 367-385   | Amyloid-related imaging abnormalities in amyloid-modifying therapeutic trials: Recommendations from the Alzheimer's Association Research Roundtable Workgroup |
| 386-395   | The Alzheimer's Association external quality control program for cerebrospinal fluid biomarkers                                                               |
| 396-401   | Prevalence of asymptomatic vasogenic edema in pretreatment Alzheimer's disease study cohorts from phase 3 trials of semagacestat and solanezumab              |
| 402-411   | Extended results of the Alzheimer's disease anti-inflammatory prevention trial                                                                                |
| 412-417   | Serum homocysteine and dementia: Meta-analysis of eight cohort studies including 8669 participants                                                            |
| 418-424   | Diabetes and cognitive decline in elderly African Americans: A 15-year follow-up study                                                                        |
| 425-435   | Magnetic resonance imaging and neuropsychological results from a trial of memantine in Alzheimer's disease                                                    |
| 436-444   | Intracranial atherosclerosis as a contributing factor to Alzheimer's disease dementia                                                                         |
| 445-455   | Transcranial Doppler ultrasound blood flow velocity and pulsatility index as systemic indicators for Alzheimer's disease                                      |
| 456-465   | Effect of <i>TOMM40</i> poly-T length on gray matter volume and cognition in middle-aged persons with <i>APOE</i> $\epsilon 3/\epsilon 3$ genotype            |
| 466-473   | Costs of care in a mild-to-moderate Alzheimer clinical trial sample: Key resources and their determinants                                                     |
| 474-485   | Steps to standardization and validation of hippocampal volumetry as a biomarker in clinical trials and diagnostic criterion for Alzheimer's disease           |
| 486-489   | How golden is the gold standard of neuropathology in dementia?                                                                                                |
| e77-e83   | In silico modeling systems: Learning about the prevalence and dynamics of dementia through virtual experimentation                                            |
| e84-e93   | Building an integrated neurodegenerative disease database at an academic health center                                                                        |
| e94-e100  | Preliminary findings from an Internet-based dementia risk assessment                                                                                          |
| e101-e108 | Volumetric and visual rating of magnetic resonance imaging scans in the diagnosis of amnesic mild cognitive impairment and Alzheimer's disease                |
| e109-e117 | AMPA workshop on challenges faced by investigators conducting Alzheimer's disease clinical trials                                                             |
| e118-e123 | Presymptomatic apolipoprotein E genotyping for Alzheimer's disease risk assessment and prevention                                                             |
| e124-e129 | Genetic association of complement receptor 1 polymorphism rs3818361 in Alzheimer's disease                                                                    |

## American Journal of Alzheimer's Disease & Other Dementias

Vol. 26 no 4. June 2011

Abstracts available online at <http://aja.sagepub.com/content/current>

|         |                                                                                                                                        |
|---------|----------------------------------------------------------------------------------------------------------------------------------------|
| 271-272 | Review of Issue: Caregiver Depression and a Plan to Manage Resistance to Care                                                          |
| 273-281 | Effects of Different Learning Methods for Instrumental Activities of Daily Living in Patients With Alzheimer's Dementia: A Pilot Study |
| 282-289 | Effects of a Motor and Multisensory-Based Approach on Residents with Moderate-to-Severe Dementia                                       |
| 290-297 | Experiences and Perceptions of Culturally and Linguistically Diverse Family Carers of People With Dementia                             |
| 298-309 | A Review of the Methods Used to Estimate the Cost of Alzheimer's Disease in the United States                                          |
| 310-316 | Understanding Caregiver Health Behaviors: Depressive Symptoms Mediate Caregiver Self-Efficacy and Health Behavior Patterns             |
| 317-325 | Using Video Simulated Presence to reduce resistance to care and increase participation of adults with dementia                         |
| 326-333 | Reliability of Repeated Cognitive Assessment of Dementia Using a Brief Computerized Battery                                            |
| 334-339 | Explanations of AD in Ethnic Minority Participants Undergoing Cognitive Screening                                                      |

## Dementia: international journal of social research and practice

Vol. 10 no 3. August 2011

Abstracts available online at <http://dem.sagepub.com/content/10/3.toc>

|         |                                                                                                                                                                          |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 281-282 | Dignity in dementia: A personal view                                                                                                                                     |
| 283-298 | 'Early days': Knowledge and use of the Mental Capacity Act 2005 by care home managers and staff                                                                          |
| 299-315 | Managing dementia agitation in residential aged care                                                                                                                     |
| 317-323 | How family carers view hospital discharge planning for the older person with a dementia                                                                                  |
| 325-340 | Living through end-stage dementia: The experiences and expressed needs of family carers                                                                                  |
| 341-359 | 'Oh he was forgettable': Construction of self identity through use of communicative coping behaviors in the discourse of persons with cognitive impairment               |
| 361-398 | I'm still the same person: The impact of early-stage dementia on identity                                                                                                |
| 399-414 | What's so big about the 'little things': A phenomenological inquiry into the meaning of spiritual care in dementia                                                       |
| 415-433 | StoryCorps' Memory Loss Initiative: Enhancing personhood for storytellers with memory loss                                                                               |
| 435-453 | A psycho-educational intervention focused on communication for caregivers of a family member in the early stage of Alzheimer's disease: Results of an experimental study |

## Dementia and Geriatric Cognitive Disorders

Vol. 31 no 6. August 2011

Abstracts available online at

<http://content.karger.com/ProdukteDB/produkte.asp?Aktion=Ausgabe&Ausgabe=255412&ProduktNr=224226>

|         |                                                                                                                                              |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 397-405 | Neuropsychological Correlates of the Proportional Impact of White Matter Hyperintensities on Mild to Moderate Dementia: The MRI 300 Study    |
| 406-412 | Prevalence of and Antecedents to Dementia-Related Missing Incidents in the Community                                                         |
| 413-416 | Decreased $\alpha$ -Synuclein Serum Levels in Patients with Lewy Body Dementia Compared to Alzheimer's Disease Patients and Control Subjects |
| 417-423 | Paraoxonase Gene Polymorphism and the Risk for Alzheimer's Disease in the Polish Population                                                  |
| 424-430 | Type 2 Diabetes and Late-Onset Alzheimer's Disease                                                                                           |
| 431-434 | White Matter Disease Independently Predicts Progression from Mild Cognitive Impairment to Alzheimer's Disease in a Clinic Cohort             |
| 435-442 | Quality of Life among Elderly Patients with Dementia in Institutions                                                                         |
| 443-450 | Instrumental Activities of Daily Living Impairment Is Associated with Increased Amyloid Burden                                               |
| 451-459 | Evaluation of a Summary Score of Cognitive Performance for Use in Trials in Perioperative and Critical Care                                  |
| 460-466 | Vascular Risk Factors and Dementia: 40-Year Follow-Up of a Population-Based Cohort                                                           |

## JAD: Journal of Alzheimer's Disease

Vol. 25 no 4. 2011

Abstracts available online at <http://www.j-alz.com/issues/25/vol25-4.html>

|         |                                                                                                                                                           |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 571-582 | Changing Perspectives on Alzheimer's Disease: Thinking Outside the Amyloid Box                                                                            |
| 583-594 | Longitudinal Changes of CSF Biomarkers in Alzheimer's Disease                                                                                             |
| 595-604 | Does Adaptive Cognitive Testing Combine Efficiency with Precision? Prospective Findings                                                                   |
| 605-622 | Brain-Reactive Autoantibodies Prevalent in Human Sera Increase Intraneuronal Amyloid- $\beta$ 1-42 Deposition                                             |
| 623-634 | Oxidative and Nitrosative Modifications of Biliverdin Reductase-A in the Brain of Subjects with Alzheimer's Disease and Amnesic Mild Cognitive Impairment |
| 635-644 | Investigating Statistical Epistasis in Complex Disorders                                                                                                  |
| 645-654 | Cholesterol and Amyloid- $\beta$ : Evidence for a Cross-Talk between Astrocytes and Neuronal Cells                                                        |
| 655-670 | High Throughput Monitoring of Amyloid- $\beta$ 42 Assembly into Soluble Oligomers Achieved by Sensitive Conformation State-Dependent Immunoassays         |
| 671-678 | Associations of Serum Cortisol with Cognitive Function and Dementia: The Rotterdam Study                                                                  |
| 679-694 | Effects of a Newly Developed Cognitive Intervention in Amnesic Mild Cognitive Impairment and mild Alzheimer's disease: A Pilot Study                      |

|         |                                                                                                                                                                               |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 695-706 | Effects of a 6-Month Cognitive Intervention Program on Brain Metabolism in Amnesic Mild Cognitive Impairment and Mild Alzheimer's Disease                                     |
| 707-718 | Prediction of Preclinical Alzheimer's Disease: Longitudinal Rates of Change in Cognition                                                                                      |
| 719-726 | The Role of Carotid Atherosclerosis in Alzheimer's Disease Progression                                                                                                        |
| 727-738 | Effect of Environmental Enrichment on the Immunoendocrine Aging of Male and Female Triple-Transgenic 3xTg-AD Mice for Alzheimer's Disease                                     |
| 739-746 | Preamalytical Sample Handling and Sample Stability Testing for the Neurochemical Dementia Diagnostics                                                                         |
| 747-762 | The Presence and Origin of Autoantibodies Against $\alpha 4$ and $\alpha 7$ Nicotinic Acetylcholine Receptors in the Human Blood: Possible Relevance to Alzheimer's Pathology |

## Journal of Geriatric Psychiatry and Neurology

Vol. 25 no 4. 2011

Abstracts available online at <http://jgp.sagepub.com/content/current>

|         |                                                                                                                                                             |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 63-66   | ABCB1 Genotype and CSF $\beta$ -Amyloid in Alzheimer Disease                                                                                                |
| 67-72   | Validity and Responsiveness to Change of Clinically Derived MDS Scales in Alzheimer Disease Outcomes Research                                               |
| 73-83   | Development of a Novel fMRI Compatible Visual Perception Prototype Battery to Test Older People With and Without Dementia                                   |
| 84-90   | Different Associations of Periventricular and Deep White Matter Lesions with Cognition, Neuropsychiatric Symptoms, and Daily Activities in Dementia         |
| 91-97   | Feasibility and Acceptance of a Nonpharmacological Cognitive Remediation Intervention for Patients With Parkinson Disease                                   |
| 98-107  | Diagnostic Indicators of Anxiety and Depression in Older Dizzy Patients in Primary Care                                                                     |
| 108-118 | Quantitative and Qualitative Analyses of the Clock Drawing Test in Mild Cognitive Impairment and Alzheimer Disease: Evaluation of a Modified Scoring System |
