

New Journals from the Resource Centre for July 2012

The Resource Centre is open to the public Monday to Friday 9 am to 5 pm.

For a complete listing of items in our collection, as well as an extensive list of online materials in 90+ languages, please consult our online Resource Centre Catalogue at http://www.alzheimertoronto.org/lib_onlineCatalogue.htm.

NEW JOURNAL ISSUES AVAILABLE

The following journal issues have been published. For your convenience, partial abstracts have been included for your convenience, with links to full abstracts also provided where available.

Please indicate which articles you would like to view and I will email/fax them to you as appropriate.

Please provide Journal title, issue number, pages & title for each article required.

## Alzheimer's & Dementia: Journal of the Alzheimer's Association

Vol. 8 iss. 4, July 2012

Abstracts available online at <http://www.alzheimersanddementia.org/current>

|     |                                                                                                                                                       |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| 247 | Biomarker development: A population-level perspective                                                                                                 |
| 250 | Improved protocol for measurement of plasma $\beta$ -amyloid in longitudinal evaluation of Alzheimer's Disease Neuroimaging Initiative study patients |
| 261 | Safety and biomarker effects of solanezumab in patients with Alzheimer's disease                                                                      |
| 272 | Leptin and dementia over 32 years—The Prospective Population Study of Women                                                                           |
| 278 | Effects of n-3 fatty acids on cognitive decline: A randomized, double-blind, placebo-controlled trial in stable myocardial infarction patients        |
| 288 | Gaining precision on the Alzheimer's Disease Assessment Scale-cognitive: A comparison of item response theory-based scores and total scores           |
| 295 | Effect of human cerebrospinal fluid sampling frequency on amyloid- $\beta$ levels                                                                     |
| 304 | Clinical and neurobiological correlates of soluble amyloid precursor proteins in the cerebrospinal fluid                                              |
| 312 | Development of biomarkers to chart all Alzheimer's disease stages: The royal road to cutting the therapeutic Gordian Knot                             |
| 337 | Worldwide Alzheimer's Disease Neuroimaging Initiative                                                                                                 |
| 343 | Some evolutionary perspectives on Alzheimer's disease pathogenesis and pathology                                                                      |
| 352 | Cardiovascular fitness is associated with altered cortical glucose metabolism during working memory in $\epsilon$ 4 carriers                          |
| 357 | Workgroup on NAPA's scientific agenda for a national initiative on Alzheimer's disease                                                                |
| 372 | Common Alzheimer's Disease Research Ontology: National Institute on Aging and Alzheimer's Association Collaborative Project                           |

## American Journal of Alzheimer's Disease and Other Dementias

Vol. 27 iss. 4, June 2012

Abstracts available online at <http://aja.sagepub.com/content/27/4.toc>

|     |                                                                                                                                                                     |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 221 | Diagnostics and Interventions for Dementia                                                                                                                          |
| 223 | Deciding When to Put Grandma in the Nursing Home: Measuring Inclinations to Place Persons With Dementia                                                             |
| 228 | Investigation of Eating Actions of People With Dementia From the Viewpoint of Self-Awareness                                                                        |
| 238 | Medication Reminder Device for the Elderly Patients With Mild Cognitive Impairment                                                                                  |
| 243 | Analysis of Caregiver Perceptions of "Hallucinations" in People With Dementia in Institutional Settings                                                             |
| 250 | Loss of Synaptophysin Immunoreexpression in Primary Progressive Aphasia                                                                                             |
| 254 | Can Rowland Universal Dementia Assessment Scale (RUDAS) Replace Mini-Mental State Examination (MMSE) for Dementia Screening in a Thai Geriatric Outpatient Setting? |
| 260 | Use of Antidementia Drugs in Frontotemporal Lobar Degeneration                                                                                                      |
| 267 | Fifty Percent Reduced-Dose Cerebral CT Perfusion Imaging of Alzheimer's Disease: Regional Blood Flow Abnormalities                                                  |
| 275 | Vascular Risk Factors and Cardiovascular Outcomes in the Alzheimer's Disease Neuroimaging Initiative                                                                |

## Dementia: international journal of social research and practice

Vol. 11 iss. 4, July 2012

Abstracts available online at <http://dem.sagepub.com/content/11/4.toc>

|     |                                                                                                                                                                                   |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 427 | Moving beyond patient and client approaches: Mobilizing 'authentic partnerships' in dementia care, support and services                                                           |
| 453 | The time perspective of the Alzheimer caregiver                                                                                                                                   |
| 473 | End-stage dementia: Aminoff suffering syndrome and decubitus ulcers                                                                                                               |
| 483 | The co-construction of couplehood in dementia                                                                                                                                     |
| 503 | Comparing day care at green care farms and at regular day care facilities with regard to their effects on functional performance of community-dwelling older people with dementia |
| 521 | Quality of life in early dementia: Comparison of rural patient and caregiver ratings at baseline and one year                                                                     |
| 545 | Towards inclusion: The beginnings of a bicultural model of dementia care in Aotearoa New Zealand                                                                                  |
| 553 | Atdementia: An information resource on assistive technologies that help support the independence of people with dementia                                                          |
| 559 | An exploration of healthcare professionals' beliefs about caring for older people dying from cancer with a coincidental dementia                                                  |

## Dementia & Geriatric Cognitive Disorders

Vol.33 iss. 5, 2012 (in progress)

Abstracts available online at

<http://content.karger.com/ProdukteDB/produkte.asp?Aktion=Ausgabe&Ausgabe=257227&ProduktNr=224226>

|     |                                                                                                                                                                         |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 289 | Vagus Somatosensory Evoked Potentials – A Possibility for Diagnostic Improvement in Patients with Mild Cognitive Impairment                                             |
| 297 | Vitamin D Deficiency, Cognitive Impairment and Dementia: A Systematic Review and Meta-Analysis                                                                          |
| 306 | Polymorphisms in the Melatonin Receptor 1B Gene and the Risk of Delirium                                                                                                |
| 311 | Amerindian Genetic Ancestry Protects against Alzheimer's Disease                                                                                                        |
| 318 | Combining Structural Brain Changes Improves the Prediction of Alzheimer's Disease and Mild Cognitive Impairment                                                         |
| 327 | Automated Hippocampal Subfield Segmentation in Amnesic Mild Cognitive Impairments                                                                                       |
| 334 | Are Patients Whose Study Partners Are Spouses More Likely to be Eligible for Alzheimer's Disease Clinical Trials                                                        |
| 341 | Randomized, Double-Blind, Parallel-Group, 48-Week Study for Efficacy and Safety of a Higher-Dose Rivastigmine Patch (15 vs. 10 cm <sup>2</sup> ) in Alzheimer's Disease |
| 354 | Activities of Daily Living in Progressive Non-Fluent Aphasia, Logopenic Progressive Aphasia and Alzheimer's Disease                                                     |

## Dementia & Geriatric Cognitive Disorders

Vol.33 iss. 6, 2012 (in progress)

Abstracts available online at

<http://content.karger.com/ProdukteDB/produkte.asp?Aktion=Ausgabe&Ausgabe=257257&ProduktNr=224226>

|     |                                                                                                                                 |
|-----|---------------------------------------------------------------------------------------------------------------------------------|
| 361 | The Technology – Activities of Daily Living Questionnaire: A Version with a Technology-Related Subscale                         |
| 372 | Nature versus Nurture in Frontotemporal Lobar Degeneration: the Interaction of Genetic Background and Education on Brain Damage |
| 379 | Alternate-Form Reliability of the Montreal Cognitive Assessment Screening Test in a Clinical Setting                            |
| 385 | The Reliability and Validity of the Mini-Mental State Examination in the Elderly Croatian Population                            |
| 393 | Delusions Increase Functional Impairment in Alzheimer's Disease                                                                 |
| 400 | Central Obesity, Leptin and Cognitive Decline: The Sacramento Area Latino Study on Aging                                        |
| 410 | Leptin and Cognition                                                                                                            |
| 416 | Impact of Beta-Amyloid-Specific Florbetaben PET Imaging on Confidence in Early Diagnosis of Alzheimer's Disease                 |

|      |                                                                                                                                                                                       |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1201 | Kidney Function and Mortality in Octogenarians: Cardiovascular Health Study All Stars                                                                                                 |
| 1208 | Kidney Function and Cognitive and Functional Decline in Elderly Adults: Findings from the Singapore Longitudinal Aging Study                                                          |
| 1215 | Glycosylated Hemoglobin and Functional Decline in Community-Dwelling Nursing Home–Eligible Elderly Adults with Diabetes Mellitus                                                      |
| 1222 | Facility-Level Variation in Potentially Inappropriate Prescribing for Older Veterans                                                                                                  |
| 1230 | Environmental Determinants of Quality of Life in Nursing Home Residents with Severe Dementia                                                                                          |
| 1237 | Objectively Measured Sleep Quality and Nursing Home Placement in Older Women                                                                                                          |
| 1244 | Angiotensin-Converting Enzyme Inhibitor Use by Older Adults Is Associated with Greater Functional Responses to Exercise                                                               |
| 1253 | Hiring and Screening Practices of Agencies Supplying Paid Caregivers to Older Adults                                                                                                  |
| 1260 | Effect of Influenza on Functional Decline                                                                                                                                             |
| 1268 | Recovery of Function Following a Hip Fracture in Geriatric Ambulatory Persons Living in Nursing Homes: Prospective Cohort Study                                                       |
| 1274 | Discrepancy Between Self- and Proxy-Rated Pain in Alzheimer's Disease: Results from the Danish Alzheimer Intervention Study                                                           |
| 1279 | Fatigability in Basic Indoor Mobility in Nonagenarians                                                                                                                                |
| 1286 | Effect of Cardiovascular and Metabolic Disease on Cognitive Test Performance and Cognitive Change in Older Adults                                                                     |
| 1292 | Effect of Medicare Part D Benzodiazepine Exclusion on Psychotropic Use in Benzodiazepine Users                                                                                        |
| 1298 | Ethnic Disparities in Adherence to Antihypertensive Medications of Medicare Part D Beneficiaries                                                                                      |
| 1304 | Self-Reported Hearing Loss in Older Adults Is Associated with Future Decline in Instrumental Activities of Daily Living but Not in Social Participation                               |
| 1310 | Association Between Mobility, Participation, and Wheelchair-Related Factors in Long-Term Care Residents Who Use Wheelchairs as Their Primary Means of Mobility                        |
| 1316 | Predictors of 1-Year Change in Patient Activation in Older Adults with Diabetes Mellitus and Heart Disease                                                                            |
| 1322 | Implementing the Objective Structured Clinical Examination in a Geriatrics Fellowship Program—A 3-Year Experience                                                                     |
| 1328 | Use of an Online Curriculum to Teach Delirium to Fourth-Year Medical Students: A Comparison with Lecture Format                                                                       |
| 1333 | Determining Prevalence and Correlates of Elder Abuse Using <i>Promotores</i> : Low-Income Immigrant Latinos Report High Rates of Abuse and Neglect                                    |
