

New Journals from the Resource Centre for May 2012

The Resource Centre is open to the public Monday to Friday 9 am to 5 pm.

For a complete listing of items in our collection, as well as an extensive list of online materials in over 75 languages, please consult our online Resource Centre Catalogue at http://www.alzheimertoronto.org/lib_onlineCatalogue.htm.

NEW JOURNAL ISSUES AVAILABLE

The following journal issues have been published. For your convenience links to full abstracts are provided where available.

Please indicate which articles you would like to view and I will email/fax them to you as appropriate.

Please provide Journal title, issue number, pages & title for each article required.

## Alzheimer's & Dementia: the journal of the Alzheimer's Association

Vol 8 iss 3, May 2012

Abstracts available online at <http://www.alzheimersanddementia.org/current>

|        |                                                                                                                              |
|--------|------------------------------------------------------------------------------------------------------------------------------|
| p. 172 | An investigation of PreMCI: Subtypes and longitudinal outcomes                                                               |
| p. 180 | Effects of Food and Drug Administration-approved medications for Alzheimer's disease on clinical progression                 |
| p. 188 | Diuretic use is associated with better learning and memory in older adults in the Ginkgo Evaluation of Memory study          |
| p. 196 | Serum antibodies to periodontal pathogens are a risk factor for Alzheimer's disease                                          |
| p. 204 | Medical and environmental risk factors associated with frontotemporal dementia: A case-control study in a veteran population |
| p. 211 | Cognitive and structural magnetic resonance imaging features of Lewy body dementia and Alzheimer's disease                   |
| p. 219 | Nonsteroidal anti-inflammatory drug use and the risk of cognitive impairment and Alzheimer's disease                         |
| p. 227 | Alzheimer's disease: Pathogenesis and prevention                                                                             |
| p. 234 | The draft "National Plan" to address Alzheimer's disease - National Alzheimer's Project Act                                  |
| p. 237 | The epidemiology of Alzheimer's disease: Laying the foundation for drug design, conduct, and analysis of clinical trials     |

## American Journal of Alzheimer's Disease & Other Dementias

Vol 27 iss 3, May, 2012

Full abstracts available: <http://aja.sagepub.com/content/current>

|        |                                                                                                                        |
|--------|------------------------------------------------------------------------------------------------------------------------|
| p. 149 | Coping With Behavior Problems in Patients With Dementia                                                                |
| p. 151 | How Statins Could Be Evaluated Successfully in Clinical Trials for Alzheimer's Disease?                                |
| p. 154 | A Clinical Approach to Early-Onset Inheritable Dementia                                                                |
| p. 162 | Conditions Associated With Wandering in People With Dementia From the Viewpoint of Self-Awareness: 5 Case Reports      |
| p. 171 | Which Cholinesterase Inhibitor is the Safest for the Heart in Elderly Patients With Alzheimer's Disease?               |
| p. 175 | Predicting Current Memory With the Modified Telephone Interview for Cognitive Status                                   |
| p. 180 | Declining Physical Capacity But Maintained Aerobic Activity in Early Alzheimer's Disease                               |
| p. 188 | Individualized Behavior Management Program for Alzheimer's/Dementia Residents Using Behavior-Based Ergonomic Therapies |
| p. 196 | Apathy: A Complex Symptom Specific to the Clinical Pattern of Presentation of Parkinson's Disease?                     |
| p. 202 | Alzheimer's Disease: Is Pacemaker Implantation Safe?                                                                   |

**Special Issue: Friendships Among People with Dementia in a Variety of Social Settings**

|  |        |                                                                                                                                             |
|--|--------|---------------------------------------------------------------------------------------------------------------------------------------------|
|  | p. 281 | Friendships and the social environments of people with dementia – Full text article available online                                        |
|  | p. 287 | Supporting the friendships of people with dementia – Full text article available online                                                     |
|  | p.305  | Maintaining friendships in early stage dementia: Factors to consider                                                                        |
|  | p. 315 | Relatedness among people diagnosed with dementia: Social cognition and the possibility of friendship                                        |
|  | p. 329 | Rethinking sociability in long-term care: An embodied dimension of selfhood                                                                 |
|  | p. 347 | The discourse of friendship: Mediators of communication among dementia residents in long-term care                                          |
|  | p. 363 | Friendships among people with dementia in long-term care                                                                                    |
|  | p.383  | Nested social groups within the social environment of a dementia care assisted living setting                                               |
|  | p. 401 | Informal social interaction among residents with dementia in special care units: Exploring the role of the physical and social environments |

## Dementia & Geriatric Disorders

|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p. 73  | The Assessment of Changes in Cognitive Functioning in the Elderly: Age- and Education-Specific Reliable Change Indices for the SIDAM                                                         |
| p. 84  | Alzheimer's Disease: Genetic Polymorphisms and Rate of Decline                                                                                                                               |
| p. 90  | Dementia Diagnosis Differs in Men and Women and Depends on Age and Dementia Severity: Data from SveDem, the Swedish Dementia Quality Registry                                                |
| p. 96  | Apolipoprotein E Gene Polymorphism in a Chinese Population with Vascular Dementia: A Meta-Analysis                                                                                           |
| p. 104 | Central Nervous System Drug Consumption Depending on the Time between Symptom Onset and the Diagnosis of Alzheimer's Disease: An Analysis by the Registry of Dementias of Girona             |
| p. 111 | Does Alzheimer's Disease with Early Onset Progress Faster than with Late Onset A Case-Control Study of Clinical Progression and Cerebrospinal Fluid Biomarkers                               |
| p. 118 | Mini-Cog and Mini-Mental State Examination: Agreement in a Cross-Sectional Study with an Elderly Sample                                                                                      |
| p. 125 | A Retrospective Analysis of the Sentence Writing Component of the Mini Mental State Examination: Cognitive and Affective Aspects                                                             |
| p. 132 | Different Clinical Phenotypes in Siblings with a Presenilin-1 P264L Mutation                                                                                                                 |
| p. 141 | Gray Matter Atrophy in Behavioral Variant Frontotemporal Dementia: A Meta-Analysis of Voxel-Based Morphometry Studies                                                                        |
| p. 149 | Metabolite Investigation in Both Anterior and Posterior Cingulate Gyri in Alzheimer's Disease Spectrum Using 3-Tesla MR Spectroscopy                                                         |
| p. 156 | CSF Biomarkers Correlate with Cerebral Blood Flow on SPECT in Healthy Elderly                                                                                                                |
| p. 164 | Efficacy and Safety of Donepezil 23 mg versus Donepezil 10 mg for Moderate-to-Severe Alzheimer's Disease: A Subgroup Analysis in Patients Already Taking or Not Taking Concomitant Memantine |
| p. 174 | Altered Distribution of the Gangliosides GM1 and GM2 in Alzheimer's Disease                                                                                                                  |
| p. 189 | Executive Function and Activities of Daily Living in Alzheimer's Disease: A Correlational Meta-Analysis                                                                                      |
| p. 204 | Symptoms of Apathy Are Associated with Progression from Mild Cognitive Impairment to Alzheimer's Disease in Non-Depressed Subjects                                                           |
| p. 210 | DAD-6: A 6-Item Version of the Disability Assessment for Dementia Scale Which May Differentiate Alzheimer's Disease and Mild Cognitive Impairment from Controls                              |

|        |                                                                                                                                                                                         |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| p. 813 | Transitions in Care for Older Adults with and without Dementia                                                                                                                          |
| p. 821 | Potentially Avoidable Hospitalizations of Dually Eligible Medicare and Medicaid Beneficiaries from Nursing Facility and Home- and Community-Based Services Waiver Programs              |
| p. 830 | Effects of Multimodal Nondrug Therapy on Dementia Symptoms and Need for Care in Nursing Home Residents with Degenerative Dementia: A Randomized-Controlled Study with 6-Month Follow-Up |
| p. 841 | Effectiveness of Tai Chi as a Community-Based Falls Prevention Intervention: A Randomized Controlled Trial                                                                              |
| p. 849 | Relationship Between Swallowing Problems and Tooth Loss in Community-Dwelling Independent Elderly Adults: The Fujiwara-Kyo Study                                                        |
| p. 854 | Antidepressant Use, Depressive Symptoms, and Incident Frailty in Women Aged 65 and Older from the Women's Health Initiative Observational Study                                         |
| p. 862 | Fruit and Vegetable Intake, Physical Activity, and Mortality in Older Community-Dwelling Women                                                                                          |
| p. 869 | Are Geriatricians More Efficient Than Other Physicians at Managing Inpatient Care for Elderly Patients?                                                                                 |
| p. 877 | A Prospective Study of Outcomes of Nursing Home Residents with Chronic Kidney Disease with and without Anemia                                                                           |
| p. 884 | Systematic Review: Individuals' Goals for Surrogate Decision-Making                                                                                                                     |
| p. 896 | The Association Between Geriatric Syndromes and Survival                                                                                                                                |
| p. 905 | Hospital Transfers of Nursing Home Residents with Advanced Dementia (pages                                                                                                              |
| p. 910 | Underuse of Diagnostic Codes for Specific Dementias in the Veterans Affairs New England Healthcare System                                                                               |
| p. 916 | Metformin, Other Antidiabetic Drugs, and Risk of Alzheimer's Disease: A Population-Based Case-Control Study                                                                             |
| p. 922 | Racial Differences in Gait Velocity in an Urban Elderly Cohort                                                                                                                          |
| p. 927 | Insufficient Help for Activity of Daily Living Disabilities and Risk of All-Cause Hospitalization                                                                                       |
| p. 934 | Frailty and Disability in Older Adults with Intellectual Disabilities: Results from the Healthy Ageing and Intellectual Disability Study                                                |
| p. 939 | Falls in Newly Admitted Nursing Home Residents: A National Study                                                                                                                        |
| p. 946 | Effect of a Disease-Specific Advance Care Planning Intervention on End-of-Life Care                                                                                                     |
| p. 951 | Built Environment and Mobility of Older Adults: Important Policy and Practice Efforts                                                                                                   |
| p. 957 | Experiencing Simulated Aging Improves Knowledge of and Attitudes Toward Aging                                                                                                           |
| p. 962 | Cadaver Treasure Hunt: Introducing Geriatrics Concepts in the Anatomy Class                                                                                                             |
| p. 967 | Functional Status After Colon Cancer Surgery in Elderly Nursing Home Residents                                                                                                          |
| p. 974 | Summary Report from the Human Immunodeficiency Virus and Aging Consensus Project: Treatment Strategies for Clinicians Managing Older Individuals with the Human Immunodeficiency Virus  |
| p. 980 | Dementia as a Moving Target                                                                                                                                                             |
| p. 983 | Chorea in an 83-Year-Old Woman: Don't Forget Huntington's Disease                                                                                                                       |
| p. 984 | Fever of Unknown Origin in an Elderly Adult with Lipid Overload Syndrome                                                                                                                |
